C. H. STEELMAN FRUIT NURSERY

R. D. No. 3, PRINCETON, N. J.

Fall, 1957 . . . Spring, 1958

TERMS

All trees and plants are offered F. O. B. Clarksville, N. J. Packing free. A deposit of 25% is required with each order, the balance before delivery, or shipment will be made C. O. D. for the unpaid balance.

As we are centrally located, we suggest, if possible, you call for your order so as to prevent delays caused in shipping.

GUARANTEE

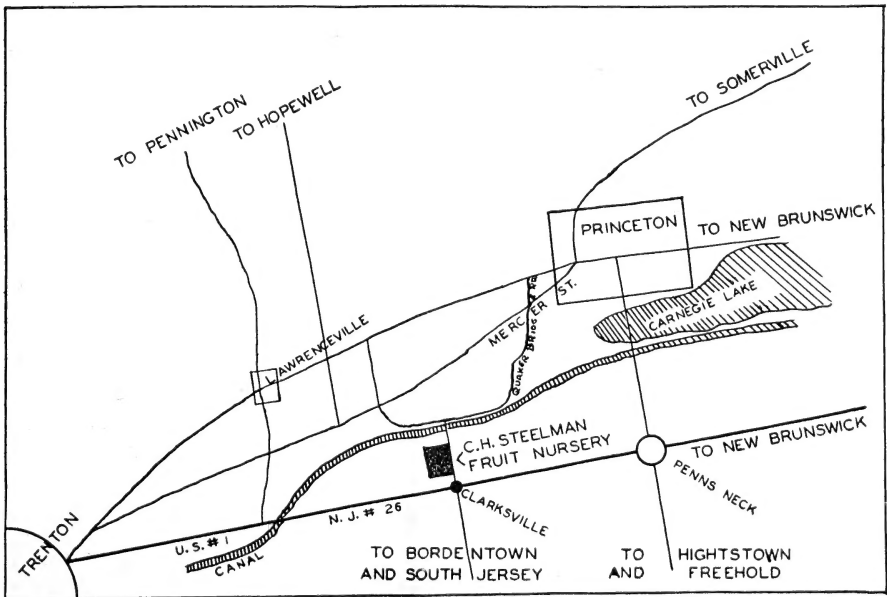

We guarantee to furnish healthy, vigorous, well grown trees or plants. We cannot be responsible for continued growth, after stock has been planted on grower's premises because such factors as faulty planting, poor soil conditions, lack of moisture, etc., are beyond our control.

All orders are accepted with the understanding that they shall be void should any injury befall our stock or should our operations be impaired by labor conditions or other conditions beyond our control.

Great care is used to avoid mistakes. In case any trees or plants prove to be untrue to the name under which they are sold, upon proper proof the original order will be replaced or the amount actually paid for such stock at the time of purchase will be refunded. The purchaser agrees to accept the stock on these terms.

LOCATION

Our nursery is located near Clarksville, N. J. on the Clarksville-Port Mercer Road, about $\frac{1}{4}$ mile from U. S. Highway No. 1. Telephone Princeton 1-2525. After December 1st Walnut 4-2525.

PEACHES

Sunhaven

A recent Michigan introduction by Stanley Johnston. A medium to large, yellow, semi-cling, ripening just after Sunrise or approximately 10 days earlier than Redhaven. A firm, fine textured, productive peach worthy on a trial basis commercially as an early Redhaven.

Redhaven

Medium to large, midseason yellow freestone of high quality, good commercial and home peach ripening between Jerseyland and Triogem.

Golden Jubilee

Medium to large, yellow freestone of high quality, productive, and hardy. A good early variety for commercial planting as well as for roadside sales and home use.

Golden Globe

A large, firm, yellow freestone of high quality ripening with Triogem or just following Jubilee. It is not as hardy in bud as some varieties but an attractive high quality commercial variety.

Halehaven

Medium to large, midseason yellow freestone of high quality and color, productive and hardy. A good commercial peach particularly adapted to heavier soils.

Richhaven

A new introduction by Stanley Johnston of Michigan resulting from a cross of Redhaven and SH 50 (J. H. Hale X Halehaven). A large, vigorous, productive tree producing a large, bright colored, round, yellow fleshed freestone fruit. A possible substitute for Halehaven where the latter becomes too dark to be attractive. Worthy of trial in commercial plantings.

Redglobe

Medium to large, very firm, midseason, yellow freestone with bright red and yellow skin color, fine texture and good flavor. Released by the U.S.D.A. in 1954 after several years of extensive tests. A new variety worthy of test.

Midway

Medium to large, yellow freestone of high quality ripening with and just after Goldeneast. It is a good yellow colored peach with blush.

Pacemaker

A large, firm, yellow variety ripening between Halehaven and Summercrest. The tree and fruit resemble J. H. Hale. Like Hale the flower is self-sterile and needs another variety for cross pollination.

Elberta

Medium to large, yellow freestone ripening in Central Jersey about Labor Day. Universally adapted to soil and environmental conditions. The nation's greatest planted variety.

7 **J. H. Hale**

Large, yellow freestone with excellent quality ripening just before Elberta. It is tender in the bud but excellent for home canning.

7 **Rio Oso Gem**

A large, firm, yellow freestone ripening about ten days after Elberta. Similar in many ways to J. H. Hale. A good commercial variety for South Jersey.

APPLES

7 **Lodi**

Very early, large, yellow apple similar to Yellow Transparent, ripening about the same season, but larger and firmer. A good cooking apple early in the season.

7 **Williams Early Red**

Very early, medium to large, red striped, productive apple. A good early dessert apple for the season.

7 **Red Gravenstein**

Red sport of Gravenstein ripening at the same early season with the high quality for eating and cooking of Gravenstein. An excellent summer apple for commercial and home use. (Only 1 yr. trees available)

7 **Starr**

A very large early apple, grown commercially for baking and cooking. (Only 2 yr. trees available)

7 **Twenty Ounce**

Summer apple, very large, productive, usually picked green for cooking and baking.

7 **Opalescent**

A large, very attractive, bright red apple generally harvested between Sept. 15 and Oct. 1 in central New Jersey. The trees are productive and the fruit generally commands top market prices when ripe.

Summer Rambo

An attractive, large, late summer apple of good quality. It may be harvested when still green and be suitable for cooking. When allowed to mature on the tree it develops red stripes and is suitable for both eating and cooking. The tree is strong, vigorous with large, thick, leathery leaves. It is productive and bears good crops annually.

Lobo

Medium to large red apple, similar to McIntosh but earlier, firmer, and hangs well to tree.

McIntosh

Medium to large fall apple, red, with a white, crisp, juicy flesh. Excellent dessert quality and used for sauce. A well known commercial and home variety. (Only 1 yr. trees available)

Cortland

Large, McIntosh type apple, striped to solid red, a good commercial or home variety where McIntosh does well. Stores well and is a good eating apple. (Only 1 yr. trees available)

Stayman Winesap

Medium to large, red striped, winter apple, of excellent quality for cooking and eating, adapted to commercial and home planting.

Oregon Scarlet Stayman

This is one of the most attractive red bud sports of Stayman. It originated in Oregon. Other than developing fruit with more and better color both tree and fruit are similar to the regular Stayman.

Red Delicious

Large, red winter apple, of excellent quality for eating, crisp and juicy, a good variety for home and commercial planting.

Double Red Delicious

A red bud sport of Delicious with all of the good qualities of that popular variety. It may be harvested earlier and develops more red color than regular Delicious.

Yellow Delicious

An attractive, high quality, golden yellow apple. Excellent for cooking and eating.

Turley

A large, attractive, red apple of good quality ready to harvest about a week before Stayman. It does not crack like Stayman and develops more red color similar to but brighter than Paragon. It is an excellent cooking apple and superior to Paragon for eating. It is the most promising substitute for Stayman.

Rome Beauty

Large, yellow apple with red stripes, very productive, annual bearer. Exceptionally good for cooking and baking and one of the best apples for storage.

Red Rome

A red sport of Rome with all its characteristics plus the added red color.

Jerseyred (N. J. No. 1)

Large red apple producing extra large fruits. Stores exceptionally well and has better quality than Rome. It will cook and bake better than Rome. For optimum color, do not overfertilize after the tree starts to produce.

Hyslop Crab Apple

Large, dark red, fruiting in clusters, very productive and excellent for preserves.

Red Fleshed Crab Apple

Large, red, with a reddish flesh, which produces an unusually attractive red jelly.

PEARS

It is necessary to have two different varieties of pears to insure proper pollination. However, Bartlett and Seckel will not cross pollinate.

Bartlett

Large, golden yellow with a blush, widely adaptable, excellent for commercial and home canning, ripening about September 1st.

Anjou

Large, yellowish green, with prominent dots and russetting, excellent for home and commercial planting. Ripening after Bartlett in late September.

Bosc

Large, tapering necked, excellent quality, pleasant aroma, brownish yellow in color, productive and hangs well to the tree, ripening late in September.

Gorham

Similar to Bartlett in appearance and quality. Ripening about ten days to two weeks after Bartlett. Stores well, a good variety to follow Bartlett.

Keiffer

Large, yellow with a blush, vigorous grower and more resistant to blight than most varieties, ripening in late September.

Wordon Seckel

Medium sized, yellow brown of excellent quality fine for pickling. Identical to regular Seckel, except larger in size. It retains all the excellent qualities of Seckel.
